SUMMARY

Software engineer focused on frontend development, with production UI work at SmiRox using HTML, CSS and JavaScript. Experience redesigning FamEase interfaces across approximately eight domains and subdomains, creating the company website UI, and delivering a complete freelance business website.

EXPERIENCE

SmiRox Ventures LLP

Software engineering (full-time) | Apr 2026 - Present

Intern | Mar 2026 - Apr 2026

- Redesigned FamEase interfaces across approximately eight domains and subdomains using HTML, CSS and JavaScript, with multiple pages used by the internal developer team.
- Reorganized interface features and replaced inconsistent layouts with a cohesive company theme.
- Created the UI and visual design for smirox.com, the company website.
- Deployed website updates through the company's existing CI/CD pipeline.

Only Apple Tech

Freelance web development | Dec 2025 - Jan 2026

- Designed, built and delivered the complete website for an independent Apple-device repair business in Bengaluru.
- Created the website UI, visual branding and vector assets using AI-assisted design tools.

Live website: onlyappletech.in
